## ***Anti-Gravity Pressure Reduction Mattresses***

### ***Luminous & Multi-Luminous Memory Foam Pressure Reduction Mattresses***

For the most sensitive patient situations in Long Term Care and Acute Care facilities, Made Rite's technicians have crafted the utmost in a premium, anti-gravity pressure reduction mattress.

To help combat the most common problem in healthcare – bedsores or decubitus ulcers - we have combined three key technology advantages. This unique combination adds up to a “whole” mattress that far exceeds the sum of its parts!

1. Memory Foam – A top layer of high-density, self-molding Visco Elastic Memory Foam envelops and supports the body – distributing weight evenly and equalizing the pressure over the entire surface. Our slow-recovery memory foam has a breathable open cell structure that is resistant to the build-up of body heat, making it the ultimate therapeutic foam mattress for patients with or at high risk of developing decubitus ulcers.
2. Stretchable Recovery Ticking – Why have a therapeutic foam interior and a covering that doesn't “give” with the patient? Our stretchable urethane fabric protects against fluids while it contours around the patient's body. This allows the patient to sink into the memory foam with little or no resistance or shearing.
3. Perimeter Rails – The Made Rite Luminous Mattresses feature additional ultra-firm foam on the perimeter. This gives extra support for patient stability and confidence, especially during patient transfers. It's also a safety consideration for both patient and employees.

The top of the line *Multi-Luminous Memory Foam Pressure Reduction Mattress* combines the memory foam on the surface layers and a 4” thick base of high density, high resiliency foam for long-lasting durability. Unlike so many air mattresses on the market these days, Made Rite's *Multi-Luminous* model requires no special equipment, pumps or motors. And it's backed by the industry's best warranty: 10-Year Non-Prorated!

“IT'S A GOOD NITE WITH MADE RITE”

Model #VE2530-75	Multi-Luminous Memory Foam	35" x 75"
Model #VE2530-80	Multi-Luminous Memory Foam	35" x 80"
Model #VE2530-84	Multi-Luminous Memory Foam	35" x 84"
Model #VE2530-XX	Multi-Luminous Memory Foam	Special Wdth

The *Luminous Memory Foam Pressure Reduction Mattress* allows advanced air flow to the surface to effectively reduce bed sores. The top layer of memory foam has been convoluted and provides optimal patient comfort by further reducing stress on pressure points. The bottom layer consists of high-density foam that offers enhanced stability and support.

Model #VE1830-75	Luminous Memory Foam	35" x 75"
Model #VE1830-80	Luminous Memory Foam	35" x 80"
Model #VE1830-84	Luminous Memory Foam	35" x 84"
Model #VE1830-XX	Luminous Memory Foam	Special Wdth

According to federal law, in most situations there is no medically valid reason for a pressure ulcer to progress to a Stage IV situation. As you know, prevention techniques include frequent turning, increased nutrition, cleaning the wounds and removing all pressure from the involved areas to prevent further decay.

Today's new guidelines require a perfect fit to avoid "entrapment" within the side and rails of the beds. Bring your mattresses into compliance by matching the "fit" of the mattress and the bed with Made Rite's "Special Width" model.

Both the Luminous and Multi-Luminous Memory Foam Mattresses are covered with stretchable urethane fabric to protect against fluids while complementing the memory foam beneath.
