

In the cost-conscious environment of today’s healthcare industry, the **Anti-Gravity Pressure Reduction (PR) Mattress** series allows smart choices for healthcare providers. The collection has been meticulously designed and crafted to provide dollar for dollar value.

All **Anti-Gravity PR Mattresses** offer strong support and durability for institutional needs. They are engineered to meet the most demanding uses. They have been time-tested with more than four decades of clinical use. These mattresses have proven their effectiveness again and again, receiving high marks among administrators and nursing professionals.

Ideal for use where low-or no-mobility residents are experiencing or at risk of pressure ulcers, the **Anti-Gravity Collection** features:

- Multi-sectional, variable density foam cores that offer superior prevention against developing skin ulcers
- Ultra-soft surfaces that significantly reduce interface pressure
- Fabrics that reduce heat build up and relieve shearing
- Durable, easy to clean covers that are moisture resistant & antimicrobial
- No pumps, motors or electrical parts for easy maintenance
- Flammability – All *Anti Gravity Pressure Reduction Mattresses* are manufactured with the Integrity 30® Fire Barrier system to conform to Federal Open Flame Standard CPSC 16 CFR PART 1633, California Technical Bulletin #129 and the NFPA Life Safety Code 101.

| Manufacturer Suggested List Price (“MSRP”) |                    |           |           |           |
