Anti-Gravity Pressure Reduction Mattresses

The Seafoam Series

The Seafoam Comfort PR Mattress

Two-sided high-density, ultra-soft polyurethane virgin foam provides excellent pressure management for Stage II Moderate Risk / Prevention patients. A specially formulated polyurethane-coated nylon ticking helps reduce heat build up, relieves shearing and resists staining. Durable, easy to clean nylon cover is stain-resistant and flame retardant. Sturdy foam rails support the perimeter of the mattress to help prevent patient fall-out.

Model # SC 1822-75	Seafoam Comfort PR	35" x 75"
Model # SC 1822-80	Seafoam Comfort PR	35" x 80"
Model # SC 1822-84	Seafoam Comfort PR	35" x 84"

The Seafoam Convoluted LP Mattress

Designed for effective pressure management for the general population, this is the economical workhorse of the healthcare industry. Primarily for Stage I Low Risk / Prevention patients, top and bottom layers are of ultra-soft, convoluted, egg-crate foam that significantly reduces interface pressure. These layers eliminate use of costly foam or gel overlays and provide savings in both maintenance and replacement costs. A specially formulated polyurethane-coated nylon ticking helps reduce heat build up, relieves shearing and resists staining. Durable, easy to clean nylon cover is stain-resistant and flame retardant.

Model # CV 1518-75	Seafoam Convoluted LP	35" x 75"
Model # CV 1518-80	Seafoam Convoluted LP	35" x 80"
Model # CV 1518-84	Seafoam Convoluted LP	35" x 84"

The Seafoam Economy LP Mattress

This is an economical replacement mattress ideal for home care use. The Seafoam Economy LP Mattress offers a one-piece design enabling use on either side for extended life of the mattress. A softer polyurethane foam core provides patient support with pressure reduction benefits to patients at moderate or low-risk for decubitus ulcers.

Model # SC1228-75	Seafoam Economy LP	35" x 75"
Model # SC1228-80	Seafoam Economy LP	35" x 80"
Model # SC1228-84	Seafoam Economy LP	35" x 84"

All Seafoam mattresses are manufactured with a fire barrier system to meet compliance with Federal Open Flame Standard CPCS 16 CFR Part 1633, California Technical Bulletin #129 and the NFPA Life Safety Code #101
